CERTIFICATE

Certified that this is a bonafide record of the project work entitled "Course Seeker (The Web-Based Project) done by the following students"

PATIL JAYESH BABULAL

AHIRE APURV KISHOR

Of the 5th semester, Bachelor of Computer Application in the year 2023 in partial fulfilment of the requirements to the award of Degree Bachelor of BBA C.A. of MSG College Malegaon.

Mr. D.J. Deore	*Mr.Nandkumar Mali*
Head of the Department	*Project Guide*

Place:Malegaon
Date:23-01-2023

ACKNOWLEDGEMENT

Here we gladly present this project report on **"Course Seeker (The Web-Based Projec)"** as part of the 5th semester BCA. At this time of submitting this report we use this opportunity to mention those people who are with us along the work. We take this occasion to thank God, almighty for blessing us with his grace and taking our endeavour to a successful culmination. We extend our sincere and heartfelt thanks to our esteemed ***guide, Mali Sir*** for providing us with the right guidance and advice at the crucial junctures and for showing us the right way. We extend our sincere thanks to our respected ***Head of the Department Mr. D.J. Deore Sir,*** for allowing us to use the facilities available. We would like to thank the other faculty members also, at this occasion. Last but not the least; we would like to thank friends for the support and encouragement they have given us during the course of our work.

ABSTRACT

Project Title :- Course Seeker.

The Project “Course Seeker” is an Free learning platform, and the project objectives is to provide individuals with access to comprehensive, self-paced courses. In this platform, we aimed at democratizing knowledge and enhancing personal development, offers a wide range of subjects, including technology, programming, design, and more. In this Project Users can select courses based on their specific interests and skill levels, engaging in a self-directed, continuous learning journey.

Additionally, the platform fosters a collaborative learning environment, encouraging users to connect with one another, share resources, and participate in online forums. Furthermore, Course Seeker's intuitive user interface and extensive collection of educational resources make it a valuable tool for individuals seeking to expand their knowledge and expertise in various fields.

Course Seeker is an innovative, online learning platform that offers a comprehensive, user-friendly experience. By providing access to a diverse array of educational resources, this platform empowers individuals to acquire new skills, engage in meaningful learning experiences, and contribute to a global community of learners.

INTRODUCTION

Project Overview :

The Course Seeker is the Web-Based Project. The main purpose of this project is to provide students with high-quality, practical courses that will help them develop the skills needed to excel in today's job market. The objectives of this project is to Offer a diverse range of courses in software development, design, business, and entrepreneurship. Recruit an expert panel of instructors who have vast experience in their respective fields. Create an interactive learning environment that encourages students to engage with the course material. Ensure a smooth learning experience for students by addressing any technical or content-related issues. Develop a community-driven approach to support and motivate students. Foster partnerships with leading tech companies to provide internship and job opportunities to students.

- Project Tools: HTML, CSS, JavaScript, etc.
- Project Budget: The project budget will be determined based on the resources required to develop the website, maintain the platform, and provide ongoing support to students.
- Project Audience: The target audience for the website includes students, working professionals, and aspiring entrepreneurs who are interested in learning cutting-edge digital skills.
- Project Future Expansion: The project has the potential to expand globally by collaborating with local partners to adapt the platform's content and resources to suit the unique needs of each country or region. Additionally, the platform could be integrated with existing learning management systems to streamline the learning experience for students.

Project Objectives :

- To educate and empower users by offering valuable information and resources on Different – Different free courses.

- To provide users with an engaging platform where they can learn from best learning courses.

- It will help students or lerners grow their skills and knowledge.

- To promote a culture of continuous learning and improvement, emphasizing the importance of staying updated with the latest trends and advancements in different courses.

- To ensure the longevity and success of the website by continually updating its content, resources, and services to remain relevant and informative to the evolving needs of the Course Seeker.

Existing System :

The existing system is manual based and needs a lot of effort and consumes enough time. Overall Structure of The website follows a clean and modern design, which includes a header, footer, and main content area. The existing system does not deal with mess calculation and complaint registration**.**

Disadvantages :

1. Inaccessible Design: The design of the website is not fully accessible, as some users may have difficulty navigating through the website due to accessibility issues. This could negatively impact the user experience for those individuals.

2. Limited Browser Compatibility: The website may not be fully compatible with all browsers, which could result in limited functionality for users who are not using the recommended browsers.

3. Poorly Optimized for Mobile Devices: The website does not appear to be optimized for mobile devices, which could result in a less than ideal user experience for those accessing the website via mobile devices.

4. Limited Language Options: The website does not offer multiple language options, which could be limiting for users who do not speak English, the website's primary language.

Technical Feasibility :

The technical feasibility in the proposed system deals with the technology used in the system. It deals with the hardware and software used in the system whether they are latest technology or not. It happens that after a system isprepared a new technology arises and the user wants the system based on that technology. This system uses the internet as a platform *HTML, CSS, JS* as front end technology. Thus Course Seeker is technically feasible.

Economic feasibility:

Economic analysis is the most frequently used method for evaluating the effectiveness of new system. More commonly known as cost/benefit analysis. HTML JS easily available in internet.

Operational feasibility:

The project has been developed in such a way that it becomes very easy even for a person with little computer knowledge to operate it. This Website is very user-friendly and dose not require any technical person to operate thus the project is even operationally feasible.

Hardware Configuration:

The section of hardware configuration is an important task related to the software development; insufficient random access memory may adversely affect the speed and efficiency of the entire system. The process should be powerful enough to handle the entire operation. The hard disk should have sufficient capacity to store the file and application.

Processor	: Intel(R) Core(TM) i3-2350M
System memory	: 128 Mb minimum 500 Mb recommended
Cache size	: 512 KB
RAM	: 1 GB(Minimum)
Hard disk	: 128Gb
Monitor	: SVGA Colour 15”
Mouse	: 104 keys US Key Serial, USB or PS/2

Software Configuration :

A major element in building a system is the section of Compatible software since the oftware in the market is experiencing geometric progression. Selected software should be acceptable by the firm and one user as well as it should be feasible for the system.

This document gives a detailed description of the software requirement specification. The study of requirement specification is focused especially on the functioning of the system. It allows the developer or analyst to understand the system, function to be carried out, the performance level to be obtained and corresponding interfaces to be established.

Front-End Tool	: HTML, CSS, JAVASCRIPT.
Operating System	: Windows 10.
Client Side	: HTML, CSS.

Welcome to Python Cources
Discover Free Python Courses
Unlock the power of Python with our collection of free Python courses! Python is a versatile and highly sought-after programming language known for its simplicity and flexibility. Whether you're a beginner or an experienced coder, our free Python courses offer a range of topics, from the fundamentals to advanced concepts. Learn how to write Python scripts, work with data, build web applications, and more. Start your Python journey today with our no-cost courses and take your programming skills to the next level!.
Best Free Python Courses
Explore our free Python courses and embark on your coding adventure.
Whether you're interested in data science, web development, or automation, Python is your gateway to endless possibilities. Join our courses to gain practical experience, work on real-world projects, and become a Python pro. Don't miss this opportunity to enhance your skills and boost your career. Start learning Python for free today!

Welcome to Free Online Courses
CourseSeeker Free Online Courses...
The online learning sector has boomed in recent years as more and more people prefer to study from home. There are many reasons why they want to learn from home and not attend offline school, college, or university. Online education is flexible and cheaper than traditional learning. Students do not have to live in another city for higher education. Working people can upskill with the help of online learning without taking leave from their current job. Free courses have made online learning more attractive. These courses are available for a wide range of subjects. All types and levels of students, including corporate executives, can upskill without spending money. You invest only your time to update your knowledge and skills.

Discover the Best Free Online Courses
Free online courses can be a great way to acquire knowledge and skills, they may not always provide formal qualifications or certifications. Therefore, when considering online learning, individuals should carefully assess their goals and whether a particular course aligns with those goals. Additionally, verifying the credibility of the platform or institution offering the course is crucial to ensure the quality of education. In the ever-evolving landscape of online education, it's crucial to stay informed about the latest trends and platforms to make the most of the opportunities available.

Harvard University

Harvard University, often referred to simply as Harvard, stands as an iconic institution in the world of higher education. Founded in 1636, it holds the distinction of being the oldest university in the United States and one of the most prestigious in the world. Located in Cambridge, Massachusetts, Harvard's rich history is interwoven with the development of the United States, and its name has become synonymous with excellence in academia. Harvard's faculty comprises some of the brightest minds and leading experts in their respective fields. Students have the privilege of learning from and collaborating with renowned scholars, Nobel laureates, and influential leaders who continue to make significant contributions to knowledge, research, and public policy. Harvard's influence extends far beyond its campus, as it has produced an impressive roster of alumni who have made a profound impact on the world. Its graduates include numerous U.S. Presidents, Nobel laureates, business leaders, activists, authors, and cultural luminaries. The Harvard community has played an instrumental role in shaping global policy, advancing scientific discoveries, and contributing to the arts and humanities. The university is committed to research that addresses complex global challenges, from climate change and public health to social justice and economic policy. Its research initiatives have a transformative impact on society, and the findings are widely disseminated to inform critical discussions and decision-

challenges, from climate change and public health to social justice and economic policy. Its research initiatives have a transformative impact on society, and the findings are widely disseminated to inform critical discussions and decision-making at local, national, and international levels. In conclusion, Harvard University represents a pinnacle of academic achievement, intellectual exploration, and societal impact. Its rich history, commitment to excellence, world-class faculty, and diverse community make it a cherished institution in higher education, poised to shape the future of learning and innovation for generations to come.
